

Miscellaneous Health Supplements

PetTek:

- **Urinary Defense (dogs only):** This product contains potent antioxidants that assist with decreasing bacteria, while maintaining healthy acidity levels in your pet's urine. This helps to decrease the occurrence of urinary tract infections and the formation of bladder/kidney stones.
- **Tear Stain Aid (dogs only):** This formulation has been a trade secret of world champion breeders and groomers for decades. It naturally aids in increasing the body's pH levels destroying the Ptyrosporin Yeast (red yeast) infection that causes the tear stains and helps to prevent the infection from developing. It does not contain any Tylosin or any other antibiotics.
- **Urinary Defense (dogs only):** This product contains potent antioxidants that assist with decreasing bacteria while maintaining healthy acidity levels in your pets urine. This helps to decrease the occurrence of urinary tract infections and the formation of bladder/kidney stones.
- **Renal Care Formula (dogs only):** This supplement is specially formulated to help animals that have been diagnosed with Renal Disease/Failure. It helps fight oxidative stress in the kidneys, improves kidney function and reduces the risk of kidney failure, helps protect the liver against damage and disease. It helps detoxify the body, remove heavy metals, toxins, radiation and chemotherapy chemicals. Strengthens the immune system, boosts energy, reduces fatigue, helps breakdown and digest carbohydrates, proteins and fats. It supplements vital nutrients that are usually missing from standard CKD (chronic kidney disease) diets.

Welly Tails:

- **Liver Tonic (Dogs or Cat):** This supports the health of the liver, kidneys, pancreas and gall bladder by helping them to regenerate healthy liver cells and boost the organs ability to filter toxins from the blood. Aids on proper function of histamine (associated with allergies, chronic inflammation) as well as protein synthesis and biochemical production for digestion. *Best used twice per year, during seasonal allergy flareups to support the liver in regulating histamine.*
